Conexión de dos ventiladores PWM (4 pines) a un único conector de alimentación de ventilador de una placa madre

El cable divisor de alimentación para ventilador, modelo FAN4SPLIT12, permite conectar dos ventiladores PWM (4 pines) a un solo conector de alimentación de placa madre, lo cual permite optimizar la capacidad de ventilación del ordenador.

Dada la flexibilidad que permite situar los ventiladores para cajas de ordenador donde sea necesario, este cable divisor de alimentación de 4 pines para ventiladores ofrece una longitud de conexión de 30 cm, lo cual evita la tensión entre el conector del ordenador y los ventiladores.
