

Gardena AquaClean 24/18V P4A, Compact, Battery, 5 m, Black, Blue, Orange, 250 l/h, 24 bar

250l/h - 24 Bar - Li-Ion - 18V - 2.5 Ah - 1.5kg

Group	Cleaning Equipment
Manufacturer	Gardena
Manufacturer item no.	14800-55
EAN/UPC	4078500053495

Description

Powerful, versatile and mobile pressure cleaning thanks to exchangeable and rechargeable battery system

GARDENA presents the AquaClean 24/18V made especially for you and all other proud and passionate house and garden owners. It is passion powered by GARDENA. One of the most versatile pressure cleaners in its class with LED battery check display integrated on the cleaner and 3 power settings delivering 9, 14 and 24 bars of pressure. Ideal for many pressure washer tasks. Cars, bicycles and trash cans can be thoroughly cleaned with the 24 bar medium pressure setting. If required, pressure can be reduced to 14 bar or reduced further to the Soft-Clean mode. This 9 bar Soft-Clean mode is particularly gentle, ideal for delicate material and objects. At the same time, the reduced pressure increases the running time of the rechargeable battery. The pressure washer is able to operate for about 38, 20 or 16 minutes depending on the operation mode. The new medium pressure washer cleaner is supplied without a battery and charger. You can use a battery system from the POWER FOR ALL ALLIANCE, one of the largest multi-brand battery alliances of leading manufacturers worldwide. Their batteries can be used for numerous devices around the house and garden. Would you prefer to buy the product with the battery system? Not a problem – then the Ready-to-Use Set is the right one for you. Three different nozzle attachments are included in the AquaClean 24/18V solo. The nozzles are used to change the spraying angle to 15° or 40°, each nozzle can be turned a full 360° in relation to the lance for greater flexibility when cleaning. The 0° spot nozzle is ideal for powerful cleaning in small nooks and crannies. Depending on your requirements, the AquaClean is also compatible with GARDENA's Dirtblaster. A 5 m long suction hose with filter, floater and clamp is included in the set. A water supply can be connected to the pressure cleaner via an OGS tap connection. Despite not being connected to the mains electricity supply, the modern AquaClean is so powerful that it can draw water from a depth of up to 2 m thanks to its auto-suction function with a flow rate of 250 litres per hour. No matter whether you want to clean your car, bicycle, the terrace, house shutters or garden furniture – thanks to its intelligent design, easy handling and a low weight of just 1.5 kg without battery, working with the pressure washer remains comfortable even for a long time. The AquaClean 24/18V P4A includes a short and a long nozzle for even more flexibility and improved ergonomics. With all these elements, this adaptable power pressure washer allows you to clean your garden, bike, car or garden furniture with very little effort and no cumbersome cables.

Adjustable water pressure and optional gentle Soft-clean mode

In addition to a medium pressure of 24 bar, the AquaClean 24/18V P4A offers two further pressure levels of 14 bar and 9 bar for maximum battery efficiency and runtime. The Soft-clean mode with 9 bar is ideal for delicate objects.

Light-weight and ergonomic handle

Intelligent design, a high-quality ergonomic handle and low weight of just 1.5 kg are just some of the aspects that make the operation of the mobile medium-pressure cleaner particularly comfortable and easy to handle.

Variety of nozzle options, automatic suction and OGS tap connection

The angle of the water jet can be set using either the 15° nozzle or the 40° nozzle, these can also be turned a full 360° in

relation to the lance. The 0° nozzle is ideal for cleaning narrow spaces. Thanks to automatic suction, the pressure washer can draw water from a depth of up to 2 m via the hose in the scope of delivery.

Main features

	General
Form factor	Compact
Power source	Battery
Hose length	5 m
Maximum flow rate	250 l/h
Working pressure (max)	24 bar
Working pressure (min)	9 bar
Battery technology	Lithium-Ion (Li-Ion)
Weight	1.5 kg
