

PRIVACY

PRIVACY FILTERS BLACK FRAMED

With a Gearlab® Black Privacy Filter you get a crisp and clear rendering of your display, while people on either side only see a glossy or matte black shield. At the same time, you protect the sensitive screen surface from scratches and damage.

Protect your company data and GDPR compliance – both on the move and in the office – by keeping your login credentials, sensitive personal and confidential data unexposed to unwanted onlookers.

Gearlab® Framed Privacy Filter for monitors.
