

Fiskars PowerGear L70 - Lopper

FiberComp / polybutylene terephthalate (PBT) - 460 mm

Group	Garden Tools
Manufacturer	Fiskars
Manufacturer item no.	1002104
EAN/UPC	6411501121905

Description

PowerGear Bypass Lopper, Hook Head (S) L70 is a small and handy lopper which makes light work of twigs and lighter branches. Like its other family members, this lopper features handles made from FiberComp to make them extremely lightweight and strong. The patented PowerGear mechanism makes the cutting 3 times easier compared to standard mechanisms and the blades made from extra hard, corrosion resistant steel (CrMoV) ensuring that they stay sharper for longer. There is a non-stick PTFE coating on upper blade to reduce friction and make cutting and cleaning easier. The hook head blades offer a distinct advantage when for example, heavy cutting of fresh wood.

Main features

Product Description	Fiskars PowerGear L70 - lopper
Product Type	Lopper - 460 mm

Extended details

	General
Product Type	Lopper
Size	460 mm
Cutting Capacity	38 mm
Blade Material	Hardened steel
Features	Non-stick coating, bypass blade, corrosion-resistant, 3X EaseCut, PTFE coating, hook-shaped head blades
	Handle
Handle Material	FiberComp / polybutylene terephthalate (PBT)
