

SPACEPOLE POINT OF SALE at a glance

The traditional static point of sale is, and will remain, a feature of the bricks and mortar store for years to come. Therefore, to ensure that the customer experience is a positive one, these customer engagement points must deliver fast and dependable operation, be accessible for all and provide an ergonomic, productive workstation for the operator.

SPACEPOLE ESSENTIALS®

Our SpacePole Essentials range of technology mounting solutions create space-saving and ergonomic work stations that improve operator productivity.

The Essentials range was created to work with existing hardware and furniture and offers robust ergonomically designed mounting solutions. With over 8 million installations worldwide, our signature product range is the mounting solution of choice for today's leading retail organisations.

ESSENTIALS OPTIONS

- ▶ Screen mount
- ▶ Screen top mount
- ▶ Back-to-back
- ▶ Swingarm
- ▶ Height adjustable
- ▶ Elbow arm
- ▶ Wall mount - angled
- ▶ Wall mount - straight
- ▶ Floor mount

HEIGHT ADJUSTABLE VESA SCREEN MOUNT

Being able to move a screen up or down to suit the individual user decreases the possibility of RSI and assists productivity. This mount is added between the screen and the VESA plate and can be supplied with new SpacePole installations as well as retrofitted to any existing installation.

The height adjustable VESA mount has a small form factor, is only 15mm deep and gives a movement of 180mm in total.

SPACEPOLE TABLET-BASED POS at a glance

Cloud-based point of sale solutions have revolutionised the retail space. They answer the need for high functionality software based apps running on consumer grade tablets. Ensuring that these solutions deliver day in day out is key. Ergonomic Solutions provides a range of contemporary tablet enclosures and associated mounting solutions that enable tablet-based point of sale applications for retail operations of all sizes.

SPACEPOLE A-FRAME™

A-Frame is a premium tablet enclosure with an emphasis on security and functionality. It is supplied with an integrated tray, allowing for precise tablet placement. A-Frame is ideal for standalone applications as it is fitted with a Kensington push-lock that provides discreet and effective security.

A range of common mounting options and accessories ensures that A-Frame is a tablet enclosure that maximises the opportunities that using a tablet brings to your business.

APPLICATIONS

- ▶ Tablet POS
- ▶ Information look-up
- ▶ Order in-store
- ▶ Digital signage
- ▶ Self-service ordering
- ▶ Front-of-house table management

SPACEPOLE C-FRAME™

C-Frame is a versatile stand-alone solution. Create a full tablet POS solution customised to suit the needs of your business by adding peripherals and accessories directly to the frame.

SPACEPOLE X-FRAME™

X-Frame is a simple, slim and secure tablet solution. It offers access to all features of the tablet and is ideal for tablet POS, digital signage and customer self-service.
