Heat Shrink End Cap for PE Cable

Heat shrink end caps are essential for situations that call for extra protection against abrasion, moisture, chemicals and corrosion.

Heat shrink end caps are most commonly used to insulate and seal off networking cables, especially useful for securing PE cables for outdoor use during the installation process. The high crimp ratio ensures a perfect seal.

- Crimping temperature +135°C
- For Ø4-8 mm PE network cables

Especificaciones

Features	Cantidad por pack	1 pieza(s)
	Color producto	Black
	Diámetro antes de encogerse	8 mm
	Diámetro después de encogerse	3,8 mm
	Material	Polyolefin
	Temperatura de contracción	135 °C
	Tipo	Heat shrink end cap
Vendor information	Brand Name	Lanview
	Warranty	5 Año/s
