

Sakura Solid Marker Original

BLXSC1A - Sakura Solid Marker Original | white

Sakura Solid Marker is the world's first solidified paint in a marker stick. It always works, anywhere, anytime! These markers can even be used in extreme, hot environments. The Solid Marker high temperature Original has a diameter of 12 mm and is available in various colours. Its innovative "stay fresh" twist mechanism keeps the paint fresh and ready to use. If the marker does dry out, it can easily be revived by trimming it with a knife. It can also be trimmed to create smaller marks.

Characteristics:

- Marks through dust and rust, on rough and smooth surfaces, inside or outside and even in water.
- Ideal for use on wood, cloth & canvas, plastic, steel & iron, rubber, cardboard, glass, fiberglass and concrete.
- Used in construction, welding & fabrication, pipelines & drilling, assembly lines, automotive tires & windshields, HVAC (Heating, Ventilation Air Conditioning), plumbing systems or with stencils.
- Dries within minutes, permanent once dry and virtually odourless.
- Removable from non-porous surfaces with alcohol or lacquer thinner.
