EV-charger pole mount
NEXT GREEN - POLEBOX 190 S

Model

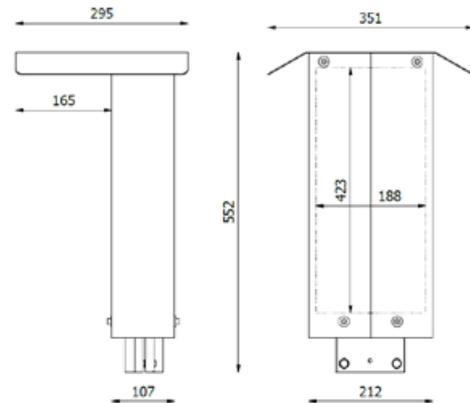

E-No:
24 803 57
S-No:
35 063 01

Product name:
Charging box mount Polebox 190 S

POLEBOX 190 S FEATURES

- For mounting on Ø 60 mm steel tubes
- Most of the installation can be prepared indoors
- Robust steel construction
- Distribution block has support for 1.5 mm² - 25 mm² cable, Al and Cu
- Prepared for mounting an RCCB/RCBO, 3G / 4G router
- Powder coated, available in various colors. Contact Next Green for more information.

Technical specifications

Material Steel, High-strength steel, Magnelis®
Color Powder coated, Graphite grey
Mark CE
Standard IEC 61439-7, IP44, IK10

Dimensions
Weight 8,4 kg
Height 552 mm
Width 351 mm
Depth 295 mm
Mounting surface 188x423 mm

Packaging dimensions
Weight 9 kg
Height 580 mm
Width 310 mm
Depth 180 mm

SELECTION OF COMPATIBLE EV-CHARGERS

- ABB Terra AC
- Amina C & D
- Charge Amps Halo
- Charge Amps Luna
- CTEK NJORD GO
- DEFA Power
- Easee
- Elinta Homebox Slim
- Eldon eHome5
- Garo Entity Compact
- Garo GLB
- go-e Charger Gemini
- go-e Charger PRO
- Phasebox 2.0
- Wallbox Pulsar Max
- Wallbox Copper SB
- Zaptec GO

Next Green Polebox 190 S is a tube or pole mount for EV-charging boxes for mounting on a 60 mm steel tube or pole. Polebox makes it easy, for example when changing from engine heater location to charging location and can therefore be used to replace an engine heater hood. The product is intended for feeding electrical cables inside the tube or pole.

Polebox has a built-in distribution terminal for up to 2 x 5G25 mm² power cable for extending the connection to the next charging post. From the distribution terminal in the Polebox, the respective charging box is then connected using a 5G2.5 mm² rubber cable.

Polebox comes with a DIN rail to mount RCCB/RCBO and can be equipped with an additional DIN rail for units such as a Wi-Fi-router or a 3G/4G modem or power supply.

Everything fits neatly inside the box. Polebox is made of Swedish steel and powder coated to provide the highest quality. Polebox is made to fit many different charger models. Mounting holes for each charger are drilled upon installation. Polebox is very easy to install. It is prepared indoors by mounting the EV-chargers and installing the wiring from the distribution terminal. Polebox is then put in place outside on the existing steel tube and the charger hood is lifted and fastened. This provides easy to access for screwing supply wires into the distribution terminal.

Suitable for EV-charging boxes with a maximum hole pattern width of 190 mm and 430 mm height.
